SEMI-PERMANENT MAKE-UP BROWS WHAT TO EXPECT POST-TREATMENT

IMMEDIATELY AFTER TREATMENT

Your brows may be a little bit swollen and/or feel dark and defined and possibly slightly distorted due to any minor swelling. This isn't the case with all clients but it can happen. This may last approximately 24 hours.

Your brows will not heal this way or this dark. They are likely to lose between 40 - 60% of colour, the shape will soften and your muscles and any swelling will relax.

THE NEXT DAY

Your brows will darken overnight, possibly for the next two days. This can often lead clients to dislike their brows, or give them 'brow shock'. Please do not panic, instead trust the healing process.

THE FOLLOWING DAYS

Your brows are well on their way to healing. Please remember to keep them dry until they have completely flaked and follow any other aftercare advice given.

DAY 5-14

Anywhere between day 5-14 your brows will flake / scab/ peel. This is a natural healing response and will look scary at first. DO NOT pick at your brows. If clients pick at their flaking brows it will result in uneven healed results and potential scarring.

AFTER THE PEELING /FLAKING PROCESS

A thin layer of skin will have developed over the tattoo giving it the appearance of looking a lot lighter and you may feel like your eyebrows have gone away or are too light.

Your tattoo may have also shrunk in size slightly. This is completely normal as the swelling will have gone down.

Over the course of the next few weeks, this thin layer of skin will shed and your brows will darken and define some more (however they will never look like they did after they were first done).

PERFECTION VISIT TIME

Your brows need a minimum of 4 weeks to heal before they are able to be perfected. If there is something you are unhappy with or you would like to be adjusted, this can all be done at the perfection visit. Your skin cannot be touched beforehand.

It is at your perfection visit that your brows can be darkened if desired, the shape tweaked and any slight edits and alters can be made.
